Dear Mr. Hamblin;

Please consider me for the internship position in Physical Therapy at your facility. I haven't had any medical classes, but I am very interested in a medical career. I really want some hands-on training and I know you can give it to me.

Last year, I took math and other required classes, where I learned all about how to do functions and formulas which might be able to help me get some kind of work with you. But other than that, that's all the technical stuff I have had or experienced. I have tried to work on CPR skills and have attempted to learn them, but they are hard to do.

I hope you can offer me some help and let me see how having a physical therapy job would be.

Call me at 860-9950.

Sincerely,

Jeannie Hifiger
